Notes and Advice to Students:

This list of materials and suppliers has been put together over the last two months to help you but is by no means exhaustive, you are free to contact other potential suppliers for donations.

Some of the suppliers will need reminding of their agreement and you will need to explain clearly, where you are from, what the project is.

The exact quantities and specification of materials for the project were unknown at the time this list was formed, it will be up to you to quantify how much of what material you require and negotiate with the supplier, remember charm and enthusiasm go a long way.

Some materials you may need to buy from the supplier, you have a limited budget so be frugal.

The best way to contact these people is usually by phone, make an appointment to visit so you can review the materials available.

Transport: Some of the suppliers maybe able to help with delivery but in other cases it may be up to you to figure out the logistics.
